

ARROW

HIGH ALKALINE CLEANER

ARROW is a highly concentrated caustic cleaner designed for use in food processing and industrial cleaning applications. Its surfactant and alkalinity penetrates and emulsifies greasy baked-on soils found in ovens, fryers, racks and trays used to cook foods. This super duty cleaner maintains a pH of 12.5 at a dilution of 100 to 1. **ARROW** is especially effective at quickly removing animal and vegetable oils from all surfaces. This highly concentrated product has a large amount of special CHELATING agents to prevent scaling of hot pressure washers and heating devices. **ARROW** has been accepted by the **USDA**. as a general cleaning agent on all surfaces.

SPECIFICATIONS:

Physical Appearance.....	Clear, liquid
Odor.....	Musty, odor
Specific Gravity.....	1.22
ph.....	Above 14(concentrate)
Viscosity.....	5 centistoke
Biodegradable	yes
Freeze point.....	-10 C
Phosphorous as % p.....	None
Flash point.....	None

DIRECTIONS:

Use the product at 1 to 10 percent of solution strength depending on soil build-ups to be removed. Adjust the concentration metering or injection devices to obtain the desired results. In vat cleaning operations, use at 140 to 200 F. Do not use undiluted on composition floors or water based paints. Do not use on aluminum, zinc galvanizing, copper or their alloys. This product rapidly attacks aluminum and zinc. The use of all cleaning compounds in **federally inspected** meat and poultry establishments must be followed by a potable water rinse.

DANGER:

CORROSIVE . Causes severe burns to eyes and skin very rapidly. Wear goggles, neoprene gloves and rubber aprons when handling product. **KEEP OUT OF REACH OF CHILDREN.**
