

# SC-89-NF

## Aluminum Safe Vat Cleaning

### Powder

\*\*\*\*\*

**SC-89-NF** is a blend of alkalinity builders, sequestrants and defoamers designed to be used in heated vat cleaners. It has a special buffered alkalinity that minimizes attack on aluminum and other alloys, but it has plenty of reserve strength to dissolve baked-on oil and varnish residues from transmissions, pistons and other aluminum parts. It saves labor by cleaning quickly without using large amounts of chemical. Spent solutions of spray cabinet degreasers release oil easily making them easy to dispose.

#### SPECIFICATIONS:

Physical Appearance.....	YELLOW POWDER
Odor.....	CITRUS
Specific Gravity.....	N/A
pH.....	12.3 (use dilution)
Viscosity.....	N/A
<b>Biodegradable</b> .....	YES
Freeze point.....	N/A
Phosphorous as % P.....	3.5 %
Flash point.....	NONE

#### DIRECTIONS:

Use **SC-89 NF** at 4 to 8 ounces per gallon of water. Maintain the vat solution at 140 to 180 degree for maximum effectiveness.

#### WARNING:

May be irritating to skin and eyes. Contains sodium metasilicate and sodium carbonate. Keep container closed, product absorbs moisture from the air. Do not transfer to unmarked container. Use with adequate ventilation. **KEEP OUT OF REACH OF CHILDREN**
